87500502	28002475	LC 81W 1200-1750mA flexC Ip ADV

### Description

Tridonic will move the Ip ADV drivers from the production facility in Shenzhen (China) to the new production location in Nis (Serbia). The production location on the device label will be changed from "Made in China" to "Made in Serbia – Europe".

To ensure product availability, the production of the affected products will be running in parallel over a certain time at both locations.

### Customer impact and application effect

The technical specification will remain unchanged, so no change or re-engineering is needed. The certificates of the products will be adjusted – adding the new factory location Nis (Serbia).
